# Introduction to the new LF webshop

In June 2015 LF published its new website (public area), designed using the latest web technology. We are now pleased to inform you that also the user area also has been refurbished to the most innovative standards. It was made available shortly before the HOST exhibition 2015, where the official presentation took place.

The new user area has been redesigned using the most effective web tools. We are now pleased to say that three major objectives were reached:

- 1 **New graphics**, in line with the new website, more appealing to the eye and therefore easier to read;
- 2 **More user friendly**, thanks to the simplification of some functions and the complete redesign of others;
- 3 Browsing made simpler and easier on **mobile devices**, thanks to its full-responsive technology, which makes the private area easy to use also with a mobile phone (like the new website).

With the publishing of the new internet shop, LF confirms its leading position also in the use of new technology!

This does not mean that we have disregarded the previous functionality! All the functions that were already present have been maintained and in the new webshop you will still be able to find these features.

A short guide to the new user area / webshop follows.

All the pages of the user area / LF's webshop can be browsed by scrolling up and down, using the scroll bar on the side or by using the scroller which is found on your mouse. By doing so, you will be able to browse the different sections on the home page and view the current special offers, news, latest publications, promoted items and other useful information.

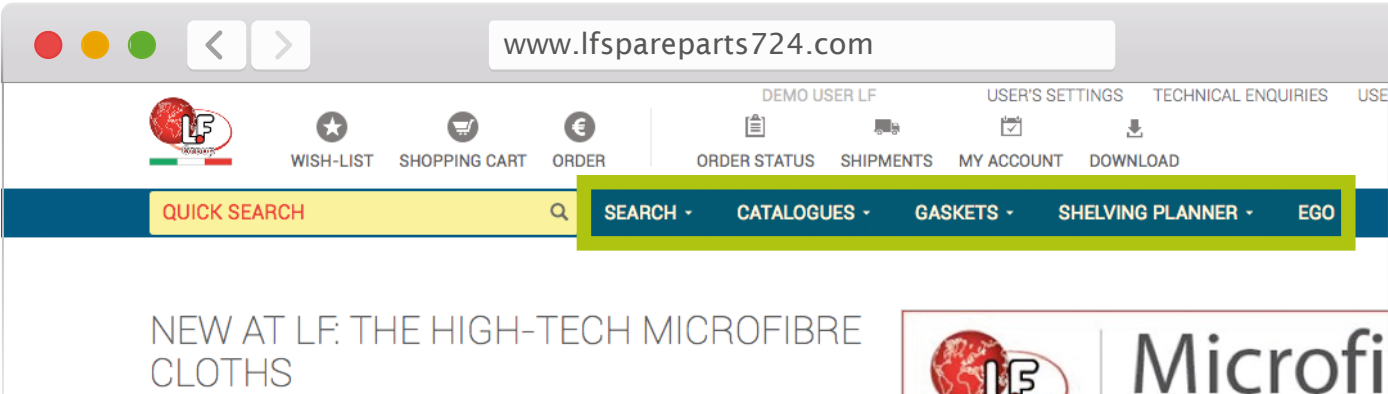

Please note: when you connect from a tablet or a mobile phone numerous pages can be browsed by scrolling sideways (the panning function). Don't forget to try it!

In the top side of the page we have placed the panel featuring the main selection functions for your orders.

On the left side, you can see all the ordering, trolley and wish list functions, which can be used as a prompt or reminder. On the right, the menu will allow you to search orders placed, their shipping details, your account information and view the download function.

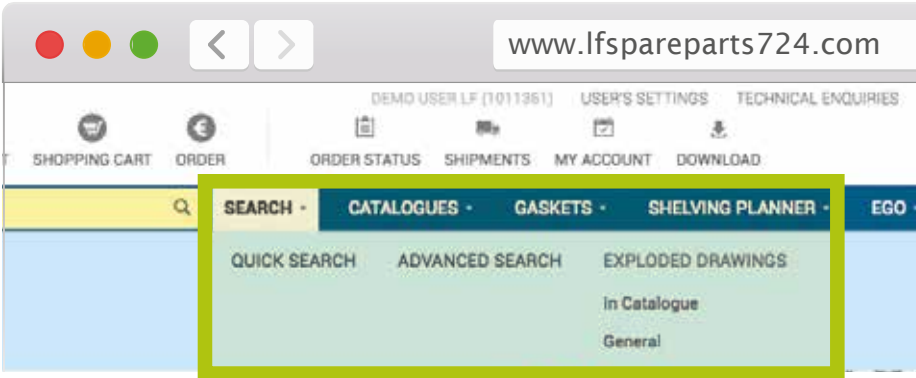

The screenshot shows the LF webshop interface. At the top, there is a navigation bar with the LF logo and various utility links: WISH-LIST, SHOPPING CART, ORDER, ORDER STATUS, SHIPMENTS, MY ACCOUNT, DOWNLOAD, SPECIAL OFFERS, and NEWS. Below this is a search bar and a secondary menu with links for CATALOGUES, GASKETS, and SHELVING PLANNER. The main content area features a large advertisement for 'NEW AT LF: THE HIGH-TECH MICROFIBRE CLOTHS'. The ad includes the text: 'Learn about the advantages of using the microfibre cloths proposed by LF. Find out about their power to absorb and capture dirt, features unknown to the ordinary cotton cloth!' and a 'DOWNLOAD PDF FILE' button. To the right of the text is a 'Microfibre' product image with the tagline 'The new high-tech challenge for cleaning, hygiene and sanitizing of horeca appliances and private users'. Below the product image are two smaller images showing the texture of the microfibre cloths.

Underneath the control panel, we have placed all the search functions, which are the core of LF's website!

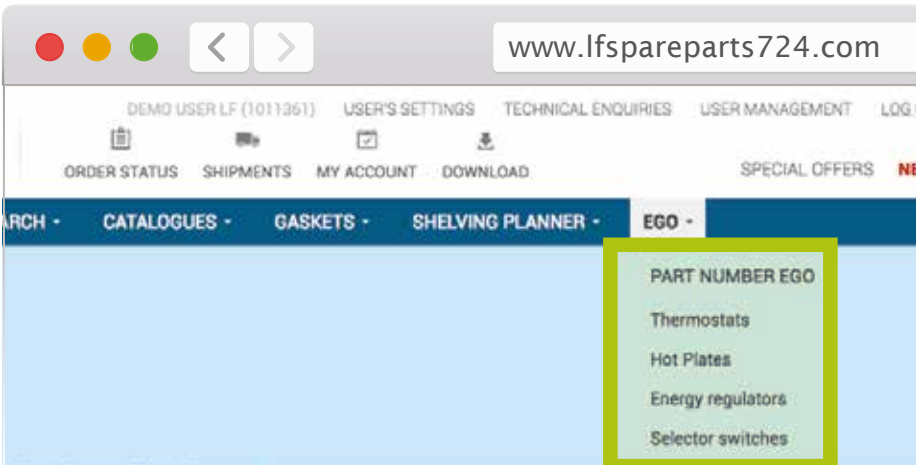

**PLEASE NOTE:** the control panel and the search menu bar are fixed and available on all pages of the website

Inside the 4 menus (Search, Gaskets, Shelving, EGO) the functions are the same as previously seen and in some cases they are even simpler.

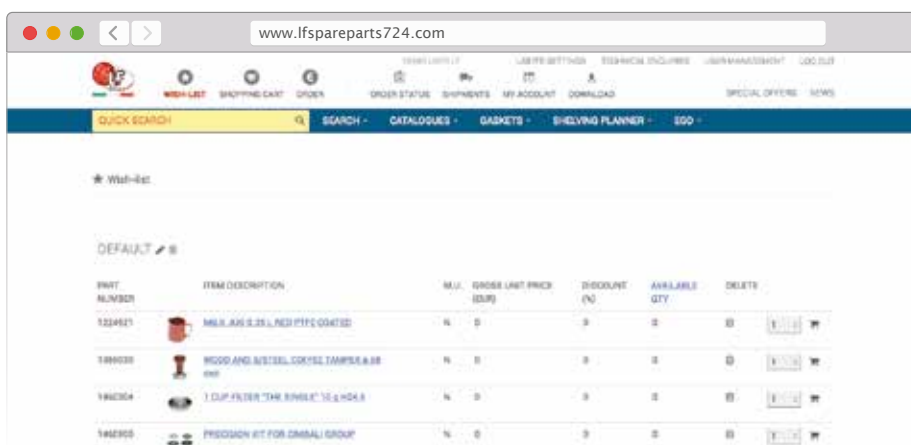

→ As you may already have noticed, we have made it possible for the search bar to be always available for you, on each page. This will allow you to gain time and have the search tool always at hand, in all menus, without having to interrupt what you are doing.

# The top 10 improvements to the new user area / LF webshop.

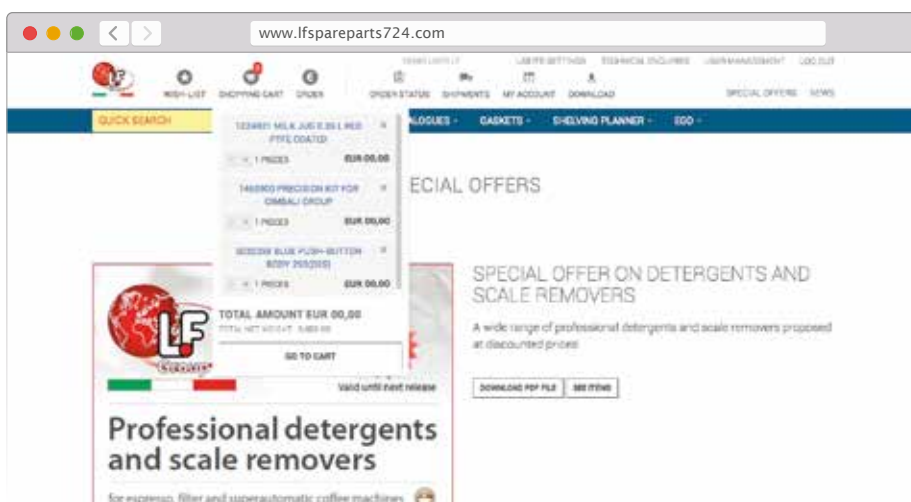

## 01.

You are now able to change an existing wish list: you can amend the name of an existing list without having to create a new one.

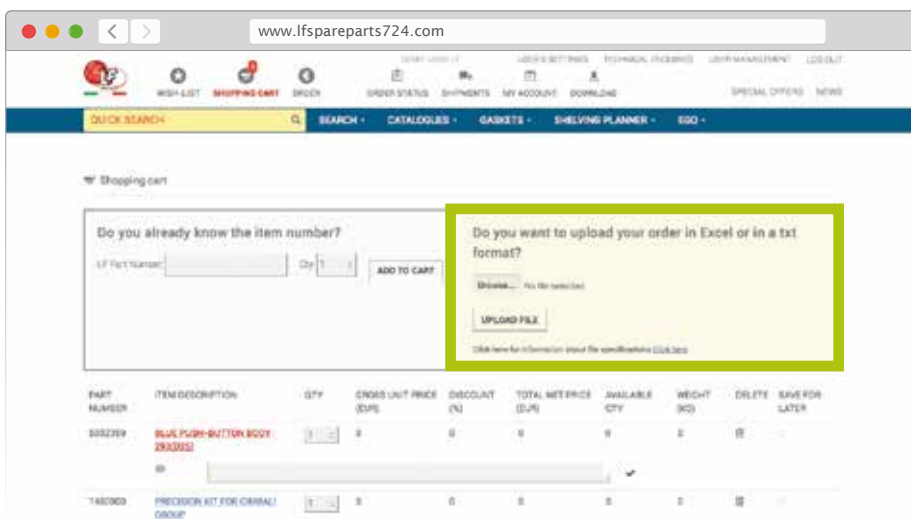

## 02.

We have introduced the disappearing cart: every time you add an item to your order or simply pass your mouse on the icon, the shopping cart pops up briefly to show the latest updates / additions. (Note: now the cart has the push-buttons to change the quantities in your order).

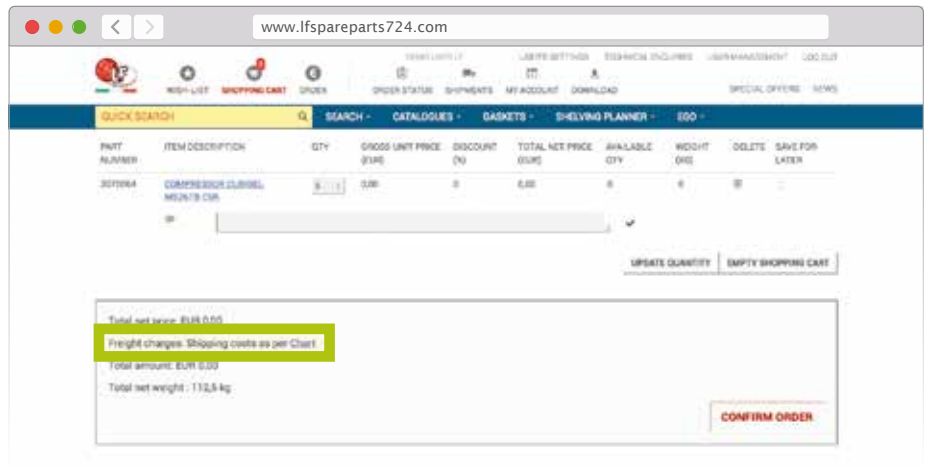

## 03.

We have introduced the order upload straight in the cart window.

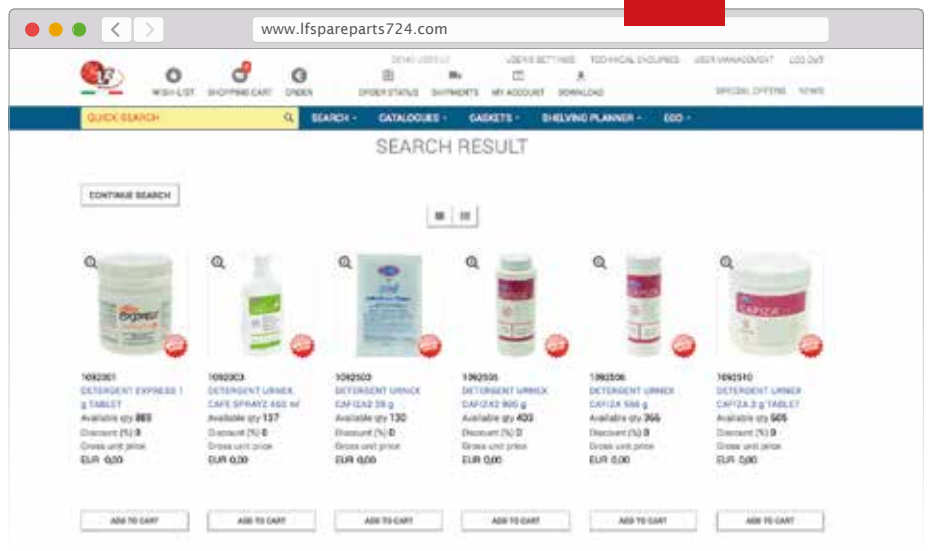

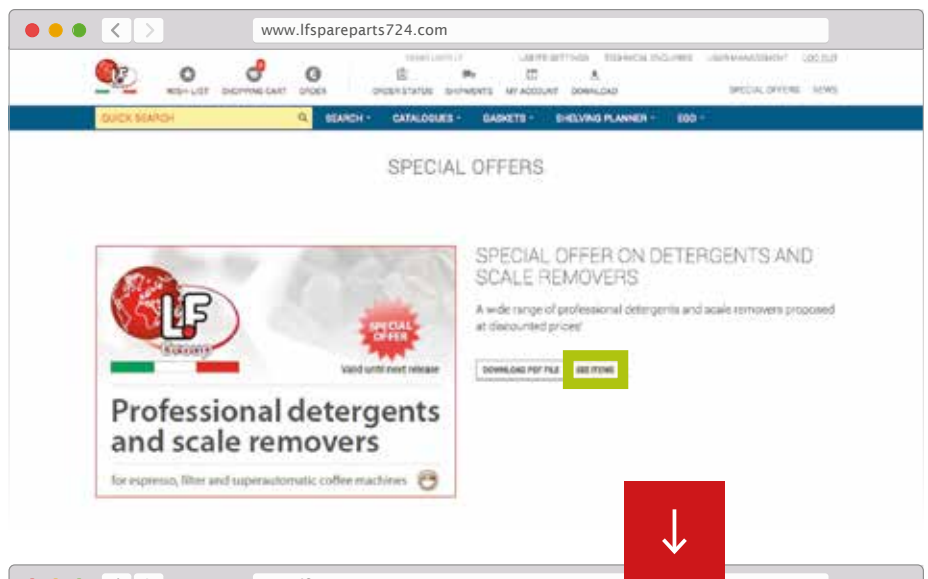

**04.**

We have made available the table for abroad shipping exceeding 30 kg, directly on the order, before confirmation.

**05.**

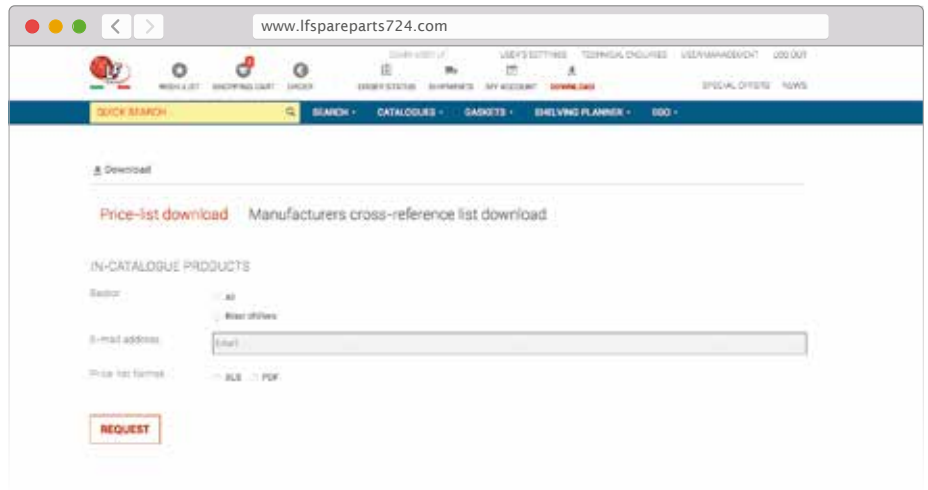

It is now possible to view the details of items contained in the flyers published in the "window" of the home page.

→ The whole website has been designed using a full-responsive technology, which makes browsing simpler and easier on mobile devices.

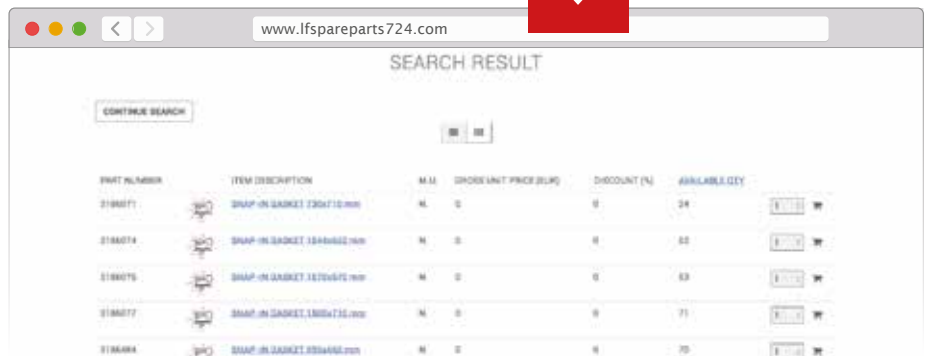

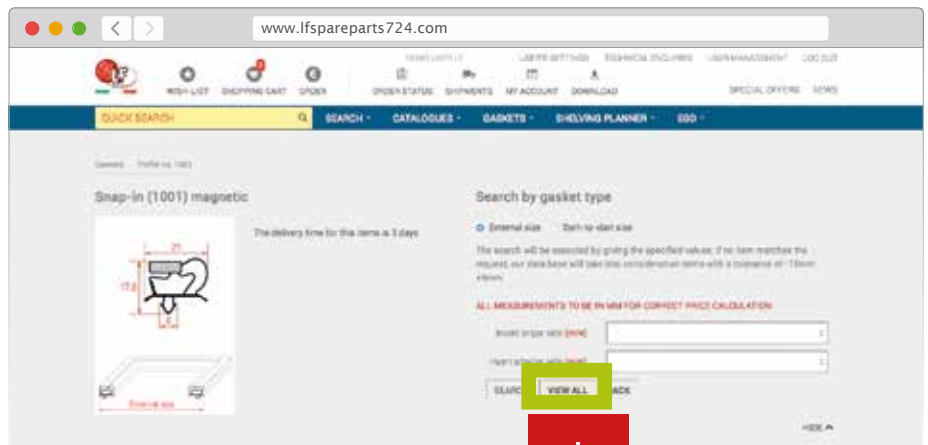

06.

We have made the **download page** more user friendly and easier for reading.

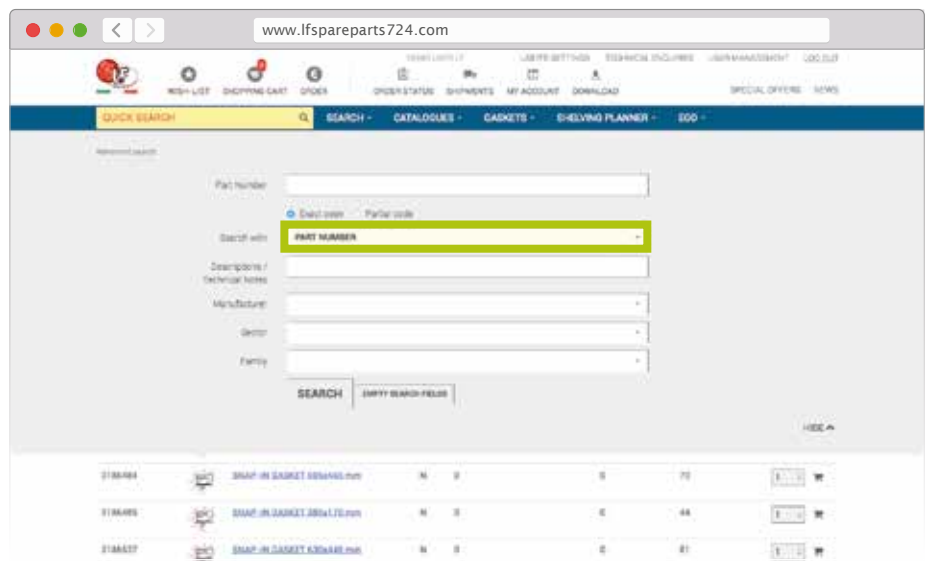

07.

In the gasket search, we have added the "view all" facility which enables you, once the required profile has been selected, to view all the available gaskets of that kind.

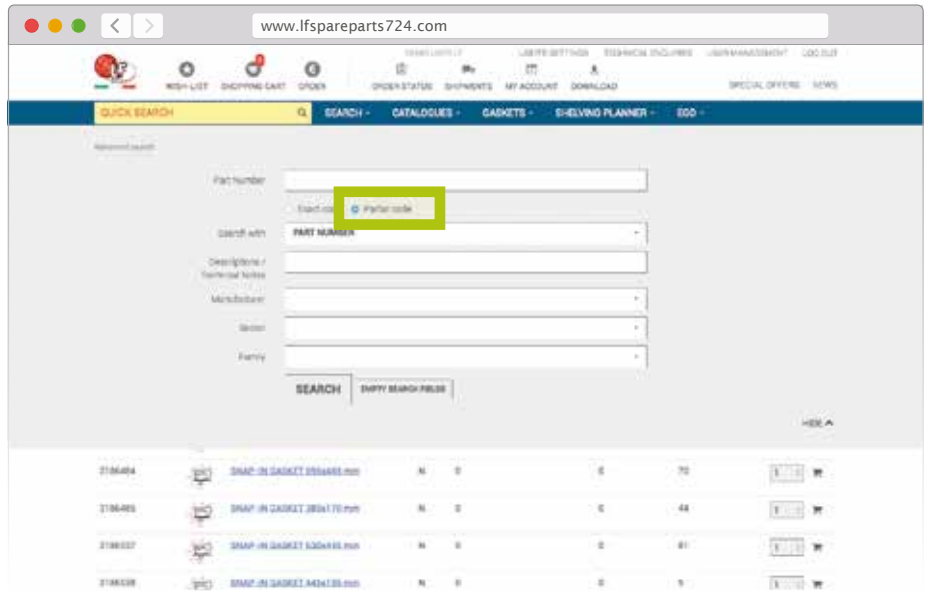

08.

In the advanced search, both the search by LF code and the one by manufacturer code are featured.

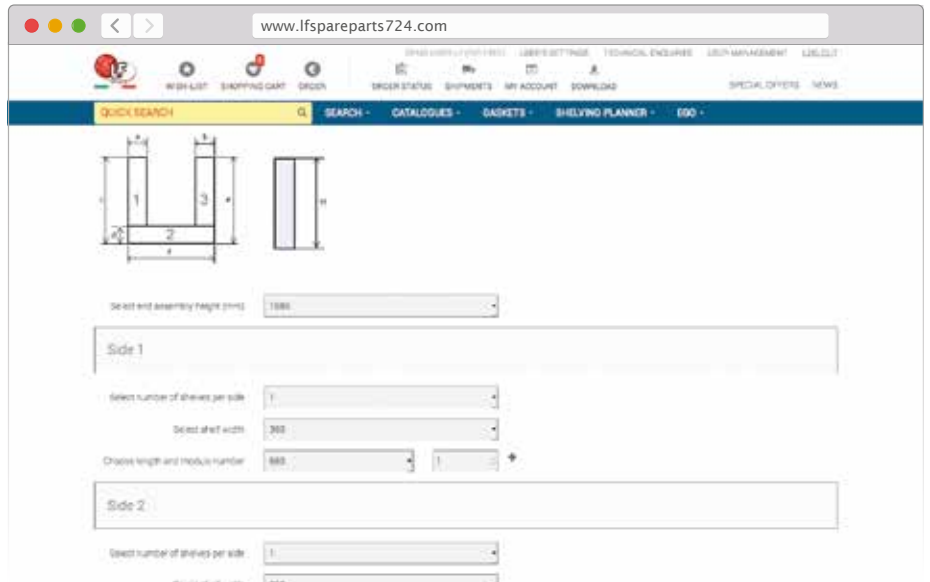

**09.**

Also in the advanced search, we have made available the function to search by contained code (this was previously only available in the search by manufacturer code).

**10.**

The shelf planning engine has been completely re-designed. It is now more user friendly, more precise and easier for viewing.

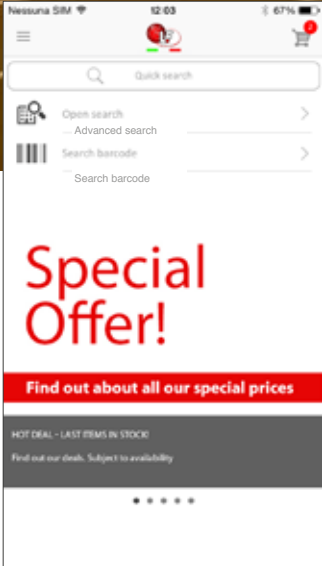

**Please note:** the content of pages may slightly vary according to users.

# App for smartphone LF iShop

Available for **iOS** and **Android** devices

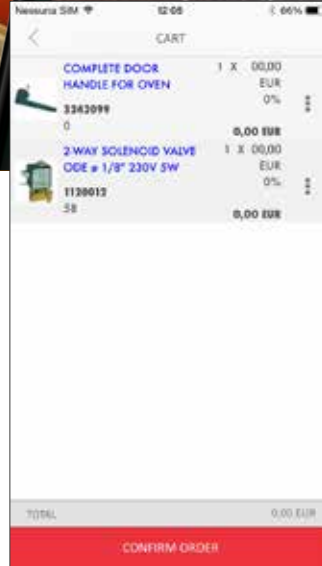

## ➤ Search function

High performing search engine, including the option to search by bar code, for easy access to product data sheets by framing the code on the item.

## ➤ Main menu

The main menu allows you to access all functions. These include exploded drawings, checking the status of an order status, tracking details, home page and logout function, language selection and the company page.

## ➤ Online shopping cart

The online shopping cart has been redesigned with improved graphics, allowing for viewing of the items and a review of what is listed in the shopping cart.

## ➤ Item data sheet

Information sheets will contain the option to zoom into images and other useful information to consider.

Spare parts for commercial kitchens, coffee machines, commercial refrigeration, bar and vending equipment and domestic sector
